Join the Lewis Society

Many of the School of Engineering’s most dedicated donors are members of the Fred J. Lewis Society. Established more than 30 years ago, the Lewis Society honors the legacy of Dean Fred J. Lewis. Under his leadership (1953–1959), the School enjoyed a great upsurge in enrollment, an expansion of facilities and a strengthening of academic programs. Today the same tradition continues through the generous support of Lewis Society members.

The Lewis Society plays an integral role in the success of the School of Engineering. The financial support of alumni, parents and friends helps deserving students receive an exemplary engineering education as well as a wonderful overall academic experience at Vanderbilt. It makes a positive difference in the lives of our students and faculty, and ensures continued growth of the school.

Please consider joining the Lewis Society today and investing in the future of the School of Engineering. If your company has a matching gift program, your gift may be doubled or even tripled. Use your matching gift to join the Lewis Society now!

For more information, please contact Lydia Park in the school’s Development and Alumni Relations Office by calling 615/322-4934.

Alumni Can Help With School Ranking

Of the 359 undergraduate engineering programs ranked by U.S. News, the School of Engineering ranks prominently among the top 50. Alumni gifts directly affect that ranking. The percentage of alumni who give back to their school is a key factor in the magazine’s ranking methodology. Currently, only 14 percent of our alumni make a gift each year to the school. You can help us achieve new levels of prominence with a gift of any size. To support your school and send the message that a Vanderbilt engineering education matters, contact the Vanderbilt Fund Office at 1-866-882-FUND, or go online to www.vanderbilt.edu/thelvanderbiltfund.

“In addition to meeting my wife, making great friends and discovering my professional calling, my years in the School of Engineering taught me how to problem-solve—a skill I now use more than ever. I am thankful to be able to give back with the hope that the next generation of engineers gain as much from VU—even if it doesn’t lead to marriage.”

Rob Alle, ’69
